How to Search

Aldlab offers two convenient search methods: Quick Search and Structure Search.

[Quick Search](#)

Quick search function is available to search all Aldlab products by any keywords such as product name, product #, CAS # in one search window.

<Key Features>

- **Suggestion Function:** As you type, the search window auto-completes your keyword, displaying several suggestions.
- **Site Contents & Product Category Search:** Not only products but also site contents and product categories are now searchable from the same search window.

Please see instructions below on how to use Quick Search function.

Keywords Type	Instruction
CAS Number	Hyphens can be abbreviated. Enter full numbers. If partial number is entered, the results will not be correct.
Product Number (or Catalog Number)	Enter one letters followed by numbers (e.g. A080224). If partial number is entered, the results will not be correct.
Product Name	Enter up to five words separated by a space and search. e.g. Enter "Acetyl Butyl" to search for product names containing both the words "Acetyl" and "Butyl".
Others	Others In case of Greek letters, enter it with English spelling not as Greek letter. e.g. alpha

Search results are displayed as 2 categories. The number of hits is indicated in each bracket.

Product: List of products that have keywords in the product name

Site Content: List of website contents that have keywords in the text.

[Structure Search](#)

Aldlab updated Structure Search function by using JSDraw as the chemical structure drawing tool. With JSDraw, you can draw a chemical structure, make Name-to-Structure conversion, import chemical structure files, sketch chemical reactions and many more function. For comprehensive instruction of how to use this structure editor, please click [User Manual](#).
